THE ELLIOTT NURSERY COMPANY

the largest bulb dealers in the world, is an association of horticultural experts.

Mr. R. F. Elliott, the head of the association, is the son, the grandson and the great grandson of a horticulturist, each of whom was a horticulturist of at least national reputation. Literally he was born and raised in a horticultural environment, and is steeped in the best traditions of the profession. He was given a very careful technical education, and he has had, in addition, over twenty years of practical experience.

Very similar has been the training and experience of the Vice-President, Mr. S. W. Leonard. The descendant of a long line of eminent horticulturists, he, too, has had a careful collegiate technical training and many years of practical experience.

Mr. C. H. Sample, the Treasurer and General Manager, is a horticulturist by deliberate choice, he having no horticultural ancestry to influence him. On leaving school he applied for a position on the company's field staff, from which he rose rapidly to the position of chief foreman. Appreciating his lack of technical training, he then left the company's service to study scientific horticulture. On his return he was still further advanced on merit, until he is now responsible for the company's entire production.

The officers mentioned above, together with their staff of assistants and department heads, know as much about Holland bulbs as Americans can ever hope to know. However, since Holland bulbs are the great specialty of this company, this was not enough. We wished to have in our organization all knowledge of this subject, and to insure this end, it was necessary that we have, as a responsible partner, a native-born Hollander. Consequently, some time ago Mr. Charles Van Zyverden, the Dutch bulb expert, was taken into the firm.

Mr. Van Zyverden, the secretary, is descended from a long line of Dutch bulb growers. He has been given the finest technical training obtainable in the Kingdom of Holland, and he has spent his life working with bulbs.

We have the largest bulb business in the world. It is obvious that a business magnitude of ours can be built and maintained only on a quality basis. Our orders to Holland are so important that the loss of his portion of them may mean the difference between a successful season and a failure to a given Holland grower. We are in a position to buy for cash. Our knowledge of bulbs is such that a Holland grower, even were he so inclined, knows that it is hopeless to attempt to deceive us on the quality of his production. We are always out to get the highest quality produced, and our buying power in the Holland markets is such that we always get what we go after.

Every year we make elaborate tests, growing thousands of bulbs, both under glass and in the open field. The newer varieties are, of course, tested to prove their worth and the standard varieties to convince the sceptic, who may then see growing side by side the bulbs selected by our own experts, the bulbs imported by houses who are not concerned with the quality of the product they distribute, as well as the bulbs imported by those few houses who are sincerely endeavoring, with their comparatively limited resources and experience, to equal our standard of quality. Anyone who will take the time to visit our test grounds will then know the reason for the complete dominance of this house in the bulb field.

To secure the cream of the world's bulb crop and to secure it at a price often less than the price charged by others for bulbs decidedly second grade, is all very well so far as it goes, but it is not enough. The bulbs must reach you in the same fine condition as that in which they left home, and they must reach you at the proper planting time. In the thirty-five years we have been in business, we have never failed to do this. An organization as carefully selected as is ours cannot fail to function efficiently, nor to give the highest class of service.

Florida in the Wintry North

Florida, with its beaches, its palms, its foliage and its leisurely beauty, has the normal temperature of our living rooms, through the Winter season in the North. During these long indoor months for Northerners when bleak winds, biting frosts and heavy snows rob us of the beauty of leaf and bud and flower outside, the heart grows lonely for the companionship and cheer that the color and fragrance of plants and blossoms bring. Beyond the decorative gifts which flowers add to the room, they bring into sensitive lives a unique friendship which is only known to those who love their plants and tenderly nurture them. Flowers someway become foster children of the Winter household.

Those who order their floral decorations either as great bunches of beauty or as developed potted plants can never know the rich joy, the refining influence or the happy diversion that comes to those who plant and develop their own flowers in the home. In many houses a blooming plant is the one great decoration of the breakfast and dinner table, while a guest room is transformed into an alluring cozy corner by the presence of a growing plant, giving tone and color and life, like the gladness of Summer, in its welcome to a weary visitor.

And what language can describe the actual charm of the little kitchen window, with its soft white curtains and its delicate flower of golden, purple, crimson and white. There is something of another world brought to us in flowers blooming at Mid-winter in the home. No family can afford to live without these uplifting touches of Nature.

Flowers in the House All Winter

It is easy to have an abundant supply of flowers in the house from Christmas, or earlier, until Easter, and with no greater facilities than are to be had in every dwelling and at comparatively small cost. The best bulbs of Paper White Narcissi cost \$6.00 per hundred, and often produce two flowers to the bulb. Florists sold these flowers last Winter at \$2.50 and \$3.00 per dozen. By growing your own flowers, you save three profits; the grower's, the wholesale dealer's and the florist's, and then you have the fun of growing them, which is simple and easy and the results certain. Another advantage is that your own flowers will last ten days, while bought flowers hardly last two or three.

For many years we have supplied a lady of this city with several thousand forcing bulbs annually. From the size and character of her order, we supposed that she had a greenhouse and a gardener, but having occasion to visit her house last Winter, we found that she grew and bloomed all the bulbs in the cellar and living-rooms of the house. We never before had seen such a fine display. Every living-room was filled with perfect blossoms, most artistically arranged. This display was kept up all Winter and Spring, until flowers were blooming in the garden. Many of us cannot grow bulbs by the thousand, but we can all have some. Paper White Narcissi and Roman Hyacinths can be had in bloom in December and, in succession, until the glorious Spring flowers are in bloom outdoors.

The bulbs may be potted up as soon as they are received in the Fall and may be put directly into the pots, jardinieres, or

other ornamental receptacles in which they are to bloom, but we find it most satisfactory to grow them in shallow wooden boxes, four or five inches deep, and, when the bulbs are coming into bloom, rearrange them in the pots, baskets, or jardinieres they are to be displayed in.

When the flowers are ready to open, take the bulbs out of the boxes, shake the soil from their roots, and rearrange with moss about the roots and bulbs in the receptacles to be used. Keep well watered and the flowers will develop just as well as if the bulbs had been allowed to remain in the soil.

The soil in which bulbs are potted should be light and rich; one-half good garden soil, one-fourth sand, and oue-fourth rotted stable manure is about right, and these should be thoroughly mixed and pulverized before using.

In planting the bulbs, set them close together, from two to four inches apart, and just deep enough to have the tops of the bulbs covered. After planting, water thoroughly, place in the coolest and darkest part of the cellar, away from the heat. Freezing will not hurt them. If the cellar is a light oue, darken a corner of it for the bulbs. While in the cellar the soil should be kept moist but not wet. After the bulbs are well rooted, they may be brought into the light and heat for flowering and then kept well watered. Paper White Narcissi and Roman Hyaciuths may be brought into the light and heat in December, but all other varieties of Hyacinths, Tulips and Narcissi not until after February 1st. Paper White Narcissi can be grown in gravel and water. Do uct attempt to force cheap mixed bulbs of any sort—the result will be a fallure.

Best Varieties For Forcing

Throughout this catalogue the varleties of bulbs suitable for house-culture (forcing) are described. To save looking throug the entire catalogue, we have listed below those varieties which we ourselves have found to be the best.

HYACINTHS-First or Exhibition Size

Ea	ıch	Dozen	100
Buff Beauty. Yellow \$.20	\$2.00	\$15.00
Charles Dickens. Lilac	.25	2.50	17.00

Forced Dutch Hyacinths

Late Tulips For Forcing

Unless you have a very considerable amount of cultural skill, and, in addition, have at your command every facility, do not attempt to force late Tulips. It can, of course, be done, but if the amateur attempts to do it, he will almost certainly fail. However, Darwin and Breeder Tulips are of unsurpassed loveliness when forced, and if you are very sure of your skill and knowledge, and wish to have something that no one in your community will be able to rival, you are justified in attempting it. Follow the directions given in the pamphiet which accompanies each of our shipments of bulbs very carefully and use only the following varieties:

Breeder Tulips	Darwin Tulips				
Dozen	100	Dozen	100		
Bronze Queen. Soft buff	5.50	Bartigon. Fiery crimson	7.00		
Bacchus. Darkest biue			12.00		
Coridion, Yellow	12.00	Philippe de Commines. Dark violet	5.50		
Don Pedro. Coffce brown	9.00	Princess Elizabeth. Deepest pink	10.00		
		William Copland. Lavender	6.00		
Panorama. Orange red	9.00	William Pitt. Rich crimson	9.00		

Collections For the House

For the inexperienced we have made up collections of bulbs suitable for house culture. These collectious contain the very best varieties for forcing and can be bought with every confidence. These collections are standard collections, and each collection is exactly like every other collection. If a different selection is wanted, this selection must be made out by the customer. If a higher priced collection is needed (above \$20.00), we will be glad to extend our service, and in the making of the collection follow the suggestions made by the customer or, if entirely left to us, use our best judgment. All that is necessary for us to know is the price limit.

Flowers by the Ten Thousand

The Easiest, Least Expensive and Most Artistic Way of Growing Myriads of Flowers.

The most inspiring floricultural idea of the last quarter of a century is the naturalizing of flowers by the thousand in situations where they need absolutely no care after planting. It is the easiest kind of gardening, for there is no weeding, watering, hoeing, staking or tying. It is the most artistic form of gardening, because the flowers fit perfectly into the landscape. It is the most effective kind of gardening, because nothing can surpass in heauty a continuous sheet of flowers all of the same variety. (No matter how numerous they may be, these wildings never seem gaudy or vulgar.) And, finally, it is the least expensive way of getting hosts of flowers—flowers like the stars of the Milky Way in multitude. A thousand Narcissus bulbs! The thought takes one's breath away; yet a thousand bulhs of the Poet's Narcissus cost only a few dollars,—a mere nothing compared with the vision of loveliness which they make possible. And the first cost is the only cost.

Small city places do not offer many opportunities for naturalizing, but some of the Spring flowers can be used in this way on the smallest lots.

When small bulbs are planted on lawns, care must be taken to arrange them in natural-looking groups. Often we see crocus scattered over the entire surface of a lawn a foot or two apart; the effect is extremely bad. In naturalizing hulhs or hardy plants, each variety should be held together in irregular-shaped groups, which should be closely planted in the center and more thinly as the margin is approached. It is a good plan to scatter the bulbs over the surface of the ground before planting any of them. Circular groups should be avoided. They may be made of almost any irregular shape, but always longer than they are hroad. The arrangement largely depends upon the situation; a hay or recess in the shrubbery may be thickly and entirely filled with one variety of bulbs, a sloping bank may be a mass of Narcissi or Tulips, or an orchard in which the grass is not mown until after July first will afford opportunities for many groups and a succession of bloom for two months or more.

The great advantage of using flowering hulhs this way is that the plantings are permanent and need never he renewed but increased in size and heauty year after year, which is much more satisfactory than the present annual waste of millions of hulbs used for inartistic heas on the lawn. These hulbs are all destroyed, as they must be removed before they are ripeued, in order to plant the undesirable bedding plants which follow them. It must be remembered that the foliage of bulbs must not be cut off before it has ripened, but this does not prevent them from heing planted in orchards and meadows, as the foliage is ripened by the time the grass is ready to cut for hay.

The only tool we use in planting hulbs is a good, strong garden trowel, with which a hole is dug for each hulh. We cover Spring-flowering hulbs on an average with about two inches, and Lilies are planted about six inches deep.

Of the great variety of Spring-flowering hulhs, the Daffodils or Narcissi are the most desirable and beautiful. Their heautiful forms and coloring and graceful hahit leave nothing to he desired, as they are easily grown and as much at home in the grass as dandelions. Of course the delicate, high-priced sorts must not he used, but there is no lack of cheap sorts that are entirely satisfactory. The Poet's Narcissus can be bought for a moderate price. They are charming flowers, blooming in May after almost other bulbous flowers are gone.

The best varieties for naturalizing are:-

Narcissi: Poeticus (Pbeasnt's Eye), Poeticus Oruatus, Poeticus King Edward VII, Barrii Conspicuus, Barrii Dorothy E. Wemyss, Incomparabilis Autocrat, Incomparabilis Cynosure, Incomparabilis Sir Watkin, Leedsii Mrs. Langtry, Leedsii Katherine Spurrell, Trumpet Empress, Trumpet Emperor, Trumpet Golden Spur, Jonquil Rugulosus, and all Crocuses.

Naturalized Daffodils are most effective when the different classes are kept by themselves and not in mixture, except, of course, where one class horders another. Here a mixture of the classes hordering each other is unavoidable and quite natural.

ELLIOTT NURSERY COMPANY

PITTSBURGH, PA.

NURSERIES SPRINGDALE, PA. BELL TELEPHONE COURT 2704

D. N. Shoemaker.

AN APOLOGY.

Owing to our inability to secure a sufficient quantity of color plates for our Bulb Catalogue this book may not contain a set of beautiful fourteen-color bulb plates.

It was due to our desire to have our color work as true to nature as possible, that we had our color-printing plates, to be used in our Bulb Catalogue, made by specialists in that line in the bulb fields of Holland, to secure the wonderful tints and shading. Fourteen colors were required in the printing.

The time between the blooming of the flowers and the sailing time of Steamer that would enable us to get the color plates in time for our catalogue, was so short that our color printer was unable to complete our entire order, and consequently it will be necessary to send out about five thousand copies of our Bulb Catalogue without the wonderful color plates.

This we regret exceedingly and as these catalogues are being sent at random to our large mailing list, it may be possible that one of your friends or neighbors may have a copy containing the color plates, and it will be well worth your while to inspect them carefully.

Omitting this beautiful work from any of our catalogues is unfortunate. However, we have already taken steps to prevent a recurrance of this next year, by placing our order early, and now that the set of these remarkable color plates are made, we promise absolutely that each of our customers will receive a complete set with his next catalogue.

Appreciating, we assure you, the confidence you have shown in placing your bulb orders with us in the past, and again soliciting your order for bulb requirements, we are,

Very truly yours,

ELLIOTT NURSERY COMPANY.

JUN 12 -2

Plants for May and June Delivery

For the convenience of people who wish to plant in May and June, we have prepared the following plants for delivery during these months. The majority of them are pot-grown, and the others have been prepared for transplanting. Stock offered in this list will be delivered immediately on receipts of order. Bulbs and Plants offered in our Bulb Catalogue will not be delivered until Fall.

AEGOPODIUM (Bishop's Weed)

Podagaria variegata. A rapid-growing plant, with neat green-and-yellow variegated foliage, thriving in any soil; makes a fine border on a bed of shrubs or for covering waste ground. 1 foot. \$2.50 per doz.; \$15.00 per 100.

ANCHUSA ITALICA (Dropmore Variety)

A grand improvement on the original type of A. italica, or Italian Alkanet, and a plant which, on account of its remarkable freedom of flowering and its beautiful blue color, is sure to become one of our most popular hardy perennials. It attains a height of 5 to 6 feet and produces its pretty blue flowers, which are from 1 to 11/4 inches in diameter, throughout the entire summer; \$3.00 per doz.; \$18.00 per 100.

ARMERIA (Sea Pink or Thrift)

Attractive dwarf plants that will succeed in any soil, forming evergreen tufts of bright green foliage, from which innumerable flowers appear in dense heads, on stiff wiry stems, from 9 to 12 inches high. They flower more or less continuously from early spring until late in the fall. Very useful in the rockery.

Formosa. \$2.25 per doz.

Maritima Splendens. \$2.25 per doz.

TALL SNAPDRAGON

The improved Antirrhinums, or Snapdragons, are splendid for bedding. They are strikingly beautiful and flower all summer. The lovely colors range from white to deep crimson through many unique shades. Also fine for cut flowers. In separate colors. \$1.75 per doz.: \$12.00 per 100.

AETHIONEMA GRANDIFLORUM

Much like the common Candytuft. Flowers in various shades of pink and purple. Plants thrive best on dry, sunny slopes. 1 to 2 feet. June to July. \$2.50 per doz.; \$15.00 per 100.

ALYSSUM SAXATILE COMPACTUM

Freely used in rockwork, as the plants make a splendid mat. The flowers are golden yellow, borne very freely in small clusters in early spring. \$2.50 per doz.; \$15.00 per 100.

Argenteum. (Madwort). \$2.25 per doz.

BUDDLEIA (Summer Lilac)

Davidii Veitchiana. One of the most desirable summer-flowering shrubs; beginning to bloom in July, it continues until cut by severe frost. The flowers are of a pleasing shade of violet-mauve. and are borne in dense, cylindrical spikes which, under library cultivation, are from 12 to 15 inches in length by 3 inches in diameter. It succeeds everywhere, flowers freely the first season planted, and is always admired. It should be planted in well-drained soil. The tops are sometimes killed to the ground in winter, but it grows 4 to 5 feet high in a season, and always blooms.

Davidii magnifica. Similar to the above, but of a deeper violet-rose color.

Davidii amplissima. A splendid hardy variety. Voluminous spikes; produces three or five together. Flowers of good size, deep violet, yellow in center. We have only a limited stock.

Any of the above, 50 cts. each; \$5.00 per doz.

CENTAUREA (Perennial Cornflower)

Montana. Grows 2 feet high, bearing large, violet-blue flowers from July to September. \$2.50 per doz.

Montana alba. A white variety of the above. \$2.50 per doz.

CALIMERIS INCISA

Grows readily in any good soil, and is an extremely dainty little perennial. The flowers are white or slightly tinged with purple and have a bronzy yellow center. 1 to 2 feet. July and August. \$2.00 per doz.; \$13.00 per 100.

CERASTIUM BIEBERSTEINII

A low-growing plant which bears a multitude of small white flowers. The foliage is silvery white and the entire plant makes a desirable edging or carpeting for borders and beds; it is attractive throughout the entire season. \$2.50 per doz.; \$15.00 per 100.

OLD-FASHONED CHRYSANTHEMUMS

These have come to be regarded as the typical flowers for autumn, although this popularity has come to them during the past ten to fifteen years. No other class of plants gives such a wide range of color—white, yellow, bronze, scarlet, crimson, and deep dull red, with many intermediate softer tones. In masses they are particularly effective, while scattered clumps enliven the whole garden. Early spring planting is desirable. When the plants have grown a few inches, pinch off the tips and repeat this in late July. This tends to give larger and better formed blooms.

LARGE-FLOWERING VARIETIES

The blooms are 3 inches or more in diameter, shaped like an aster. Slight protection during the winter.

	Per doz.	Per 100
Pink	\$2.50	\$15.00
White	2.50	15.00
Yellow	2.50	15.00

POMPON CHRYSANTHEMUMS

These are the small-flowered Chrysanthemums of the old-fashioned gardens and bloom in October and November, after almost all flowers are gone. They are showy in the garden and effective as cut-flowers, and, being perfectly hardy and of easiest culture, can be successfully grown in any garden. We offer a fine collection of the best varieties, ranging from white to deep crimson. 20 cts. each; \$2.00 per doz.; \$13.00 per 100.

COREOPSIS GRANDIFLORA

An improved variety, with large, bright yellow flowers; fine for cut-flowers; one of the best hardy plants in cultivation. 20 cts. each; \$2.25 per doz.; \$14.00 per 100.

DELPHINIUM

Chinense. Fine, feathery foliage and intense gentian-blue flowers in open panicles. \$2.50 per doz.; \$15.00 per 100.

Chinense album. A pure white form of the above. \$2.50 per doz.; \$15.00 per 100.

HARDY FERNS

Varieties marked * require sbade; those marked \$ succeed in open border.

*Adriantum pedatum. (Maidenhair Fern).

*Aspidium acrostichoides (Wood Fern).

§Aspidium marginale.

*Asplenium Filix-fæmina (Lady Fern)

§Dicksonia punctilobula (Gossamer Fern).

§Onoclea.

§Onoclea Struthiopteris (Ostrich Fern).

§Osmunda Claytoniana (Flowering Fern).

§Osmunda regalis (Royal Fern).

\$2.50 per doz.; \$15.00 per 100.

FUNKIA (Day Lily)

Desirable foliage plants which will thrive in sun or shade.

Variegata. Variegated foliage; blue flowers. Beautiful edging plant. 1 foot high, blooming in May. \$2.25 per doz.; \$14.00 per 100.

Sieboldii. One of the finest of the hardy plants on account of splendid foliage. Grows 2 feet high and blooms late in summer. \$2.50 per doz.; \$15.00 per 100.

Aurea maculata. Young foliage in early spring is of a bright yellow color, \$2.50 per doz.

FOXGLOVES

Striking and impressive biennial plants with large downy leaves and tall spikes of thimble-shaped blooms. They may be grown in small clumps, or naturalized in the shrub borders and along the edges of woodlands. They grow readily in shaded places.

Purpurea. Old-fashioned purple Foxglove. \$2.25 per doz.; \$14.00 per 100.

FESTUCA GLAUCA

A dwarf grass with very distinct blue foliage. Does not grow over 8 to 10 inches high and is very effective. \$2.50 per doz.

GEUM (Avens)

Pretty border plants, growing about 18 inches high, and producing brilliant, showy, bright-colored flowers during the greater part of the summer and fall.

Atrosanguineum. Large, dark crimson flowers.

Coccineum. Showy scarlet flowers.

\$2.50 per doz. \$15.00 per 100.

GENISTA ELATIOR

At last we have a Genista, or Broom, that is perfectly hardy in this climate. All know the yellow-flowered Genistas that the florists sell for Easter at prices ranging from two to ten dollars each. This hardy Genista is just as beautiful as these and can be grown in anyone's garden or shrubbery. It is of slow growth, but eventually reaches a height of 3 to 4 feet and as many feet across. In June it is covered with beautiful yellow, pea-shaped flowers which continue a long time on the plant. We consider this one of the most valuable small shrubs introduced during many years. Pot-grown plants, 25 cts. each; \$2.50 per doz.

GAILLARDIA GRANDIFLORA (Blanket Flower)

One of the showiest and most effective hardy plants, growing about 2 feet high and succeeding in any soil in a sunny position; beginning to flower in June, they continue the entire season. The large flowers are of gorgeous coloring. The center is dark red-brown, while the petals are marked with rings of brilliant crimson, orange and vermilion, and often a combination of all in one flower; excellent for cutting. \$2.50 per doz.; \$15.00 per 100.

HEUCHERA SPLENDENS

We have thoroughly tested this new Heuchera and find it one of the most desirable hardy plants introduced in many years. It has the same habit and foliage as Heuchera sanguinea, but the color is a more brilliant crimson, and five or six times as many flowers are produced. Blooms in May and when in bloom is about 15 inches in height. 25 cts. each; \$2.50 per doz.

IBERIS

Saxatilis corifolia. Candytuft. A large snow-white flower. 8 to 10 inches. May. \$2.50 per doz.

Sempervirens. Hardy Candytuft. The flowers are white, borne with

Sempervirens. Hardy Candytuft. The flowers are white, borne with great freedom, while the foliage may remain green all winter. About 1 foot. April to Jun. \$2.50 per doz.

Sempervirens nana. A dwarf form of the preceding. \$2.50 per doz.

LYCHNIS SPLENDENS (Double Red)

Forms a dense tuft of evergreen foliage, and in June it sends up tall spikes of handsome double, deep red flowers of exquisite fragrance, which remain in perfection six weeks. 25 cts. each; \$2.50 per doz.

MERTENSIA VIRINICA (Blue Bells)

An early spring-flowering plant, growing about 1 to 1½ feet high, with drooping panicles of handsome light blue flowers, fading to clear pink. One of the most interesting of our native spring flowers. May and June. \$2.50 per doz. \$15.00 per 100.

TRITOMA PFITZERI (Flame Flower, or Torch Lily)

This new Tritoma is undoubtedly one of the most valuable introductions of recent years. Tritoma Uvaria, or "Red-Hot Poker" plant, is highly prized on account of its picturesque appearance and its blooming so late in the fall after almost everything else is gone. This new variety is a great improvement in every respect. The flowers are much more refined and beautiful and are produced in the greatest profusion from early summer until late fall, coming into bloom at least two months before the older variety. It is equally desirable for garden effects or for cut flowers. The flower-spikes are of gigantic size, frequently 4½ feet high, with heads of bloom over 12 inches long, of a rich orange-scarlet; shading to salmon-rose on the edge; a first-class acquisition. This plant is not quite hardy and should be protected in winter with a covering of leaves, or can be taken up, packed in sand and stored in a cold cellar over winter. \$2.50 per doz. \$18.00 per 100.

HARDY PERENNIAL PHLOXES

The beauty and usefulness of these grand border plants give to them a deservedly first place among hardy plants. For cutting, their large trusses go a long way in floral decoration. In color they range from pure white to the richest crimson and purple and from soft rose and salmon to bright coral-red, all having a delicate fragrance. Perennial Phloxes succeed in almost any soil enriched with manure, but are much benefited by a mulching of decomposed manure in spring, and in hot weather an occasional soaking of water. If the first spikes of bloom are removed as soon as over and the plant given a good soaking of water, they will produce a second supply of flowers, thus continuing the display until late in autumn. These later blooms are often finer than the first.

Pot-grown plants, ready for immediate delivery, 30 cts. each; \$2.50 per doz.; \$15.00 per 100, except where noted.

Athis. Salmon; a splendid tall variety.

Eclaireur. Purple-carmine blooms with a white center.

F. B. Waldeck. Splendid pure white.

Mrs. Jenkins. One of the earliest pure white varieties.

Miss Lingard. Early flowering; pure white blooms with a faint lilac eye. Splendid for mass planting, as it will bloom in June and again in September if the old flowers are cut. Not infested with red spider.

N. Smith. Crimson.

Obergartner Wittig. Light rose, center lighter with carmine eye. Prof. Schliemann. Lilac-rose with carmine eye.

Rhinelander. Salmon-pink; both flower and truss are immense in size, and the color is intensified by a brilliant carmine eye.

Rosenberg. Bright reddish violet, with blood red eye; individual flowers as large as silver dollars.

Riverton Jewel. Rose, with brilliant carmine or red eye. Widar. Reddish purple with large white center.

PENTSTEMON (Florists' Varieties)

Few plants are so beautiful as Pentstemons, or produce so brilliant an effect in beds and borders during summer and autumn. In growth they are graceful, while the elegant beauty of their pyramidal spikes of large, gloxina-like flowers from June to October elicits the admiration of all. Colors range from blush-white, pink, salmon, rose and scarlet to violet and shades of purple. They thrive in any ordinary garden soil, in an open and sunny situation. Cuttings should be taken in autumn and planted out in spring, as the parent plants will survive the winter outdoors only in sheltered gardens. \$1.50 per doz.

BALCONY PETUNIAS

As many of our customers have failed in growing these splendid Petunias from seed, we have grown a lot and of four colors—violetblue, dark crimson, pink and white. The violetblue variety is most distinct and effective and always attracts great attention and admiration. \$1.75 per doz.; \$12.00 per 100.

PENNISETUM JAPONICUM

This new Hardy Grass is very desirable. It grows 4 feet high, with slender, graceful foliage and showy plumes thrown well above the leaves. Most valuable for adding variety to the garden planting. 25 cts. each; \$2.50 per doz.

POLEMONIUM CERULEUM (Jacob's Ladder)

Useful border plants about 12 inches high, with deep green, finely cut foliage and spikes of showy blue flowers in May and June; of graceful growth. \$2.25 per doz.

POLYGONUM AUBERTI

A great improvement on the Polygonum Baldschuanicum. The flower trusses are large, the flowers pure white; it grows still more rapidly, and does not suffer from the illness which makes the leaves wither and drop from the old variety. A plant in full flowers gives the impression of being altogether covered with hoar-frost. We have tested this vine and pronounce it the best flowering climber produced in twenty-five years. It surpasses Clematis paniculata, and the flowers last twice as long. 75 cts. each.

LOBELIA CARDINALIS

Flowers are Indian pink. The most showy of all out native plants; no other flower compares with the brilliancy of the blooms, which are a rich cardinal color. The blooms are rather loosely clustered at the end of flower-stems from 2 to 4 feet long. July to September. \$2.50 per doz.; \$15.00 per 100.

ORIENTAL POPPIES

I remember very well the first time I saw an Oriental Poppy, I was a hoy then, and it excited me wonderfully, and I thought it the most remarkable flower in the world; and now, after twenty-five years have gone by and I have seen almost all the known flowers of the world, I am still of the opinion that it is mighty fine, striking and effective, and I have taken the trouble to gather and have grown a collection of several varieties. The foliage of Oriental Poppies dies away in the summer, and many think they are dead, but they will start into growth again in the fall. They are rather hard to establish, but once established, prove the most persistent perennial.

Cerise Beauty. Beautiful cerise.

Mrs. Perry. Salmon-rose; lovely.

Orientalis. The type; bright red.

Silberblick. Salmon-red with white spots.

Queen Alexandra. Salmon pink.

\$2.50 per doz.; \$15.00 per 100.

STOKESIA CYANEA

(Cornflower Aster, or Stokes' Aster)

A most charming and beautiful native hardy plant, which, for many seasons, has been the most admired flower on our grounds. The plant grows from 18 to 24 inches high, bearing freely, from early in July until late in Octoher, its handsome lavender-hlue centaurea-like blossoms, which measure from 4 to 5 inches across. It is of the easiest culture, succeeding in any open, sunny position, desirable as a single plant in the hardy border and effective in masses or beds of any size.

Alba. Pure white variety of the above.

Caerulea. Beautiful light blue.

\$2.50 per doz.; \$15.00 per 100.

SALVIA (Sage)

Improved Dwarf. Spikes of brilliant scarlet flowers. \$1.50 per doz.; \$10.00 per 100.

Splendens. The old-fashioned, tall-growing variety. \$1.50 per doz.; \$10.00 per 100.

	DESIRABLE HARDY PLANT	\mathbf{S}	
	Ajuga reptans atropurpurea. Large spikes of purplish blue flowers in May. Valuable plant for the rockery and for carpeting the ground in shady places where	Doz.	100
	grass will not grow		\$14.00
	Armeria maritima splendens. (Thrift or Sea Pink). Charming dwarf plant with pink flowers	. 2.25	14.00

HARDY CLIMBING PLANTS

HARDY CLIMBING PLANTS	,	
Ampelopsis quinquefolia. Virginia Creeper. Clings firmly to walls or any support and makes a dense covering because of its large, handsome, green foliage. In the fall the leaves change to hrilliant scarlet. One of the most decorative native climbers	Each.	Doz.
Veitchii. Boston Ivy. Grows very rapidly after it is once established, and clings closely to any surface. The large, dark green leaves turn to rich crimson		\$ 0.00
in the fall. Standard plants Extra strong plants	.35 .50	3.50 5.00
Clematis Paniculata. Probably the most beautiful of all the hardy vines. Makes a strong, luxuriant growth, has delicate foliage, and blooms profusely. In August or September the white flowers literally conceal the vine; when the petals have fallen they are followed by seed clusters and a profusion of feathery "styles" like drifted snow. Usually the vine is given a support, but this is not required, for it is just as handsome when planted in rockwork or so arranged that its growth is made over sloping barts. But alasts.	20	3.00
banks. Pot plants	.30	3.00
slow growth and elegant rich green foliage	.25	2.50
Radicans variegata. A beautiful variegated variety of the above. Rich green foliage distinctly marked with white. Fine for low stone walls	.25	2.50
Hedera helix. English Ivy. The well-known variety with small leaves which has proved perfectly hardy. Largely used for covering walls, loose rocks, fences or trellises	.35	3.50
Lonicera Brachypoda. Hall's Japanese Honeysuckle, A strong-growing variety, which is in almost con- tinuous bloom. The fragrant flowers open white and gradually change to buff. \$20 per 100	.30	3.00
Japonica aureo-reticulata (L. brachypoda reticulata.) Golden Honeysuckle. Great quantities of white flowers are borne in pairs. The foliage remains green until late in the autumn, and in protected locations may be evergreen all winter. \$18 per 100	.30	3.00
Japonica. Bears a multitude of fragrant yellow flowers, but is particularly desirable because of its		
dark purplish green foliage, which is practically evergreen. \$20 per 100	.30	3.00

CLIMBING HYDRANGEA

We have at last succeeded in getting a stock of the rare Schizophragma hydrangeoides, known as the Climbing Hydrangea. It is one of the rarest and most beautiful Vines, having large flower-heads similar to those of Hydrangea hortensia, and will make a most splendid adornment to the porch. Fine, strong, pot-grown plants. \$1.00 each.

ROSA SPINOSISSIMA

We have again succeeded in getting a stock of this rare and exquisitely beautiful single hardy Rose. In our opinion it is one of the most beautiful things on earth, and is surpassed only by the Cherokee Rose of the South, which is not hardy in our climate. This Rose grows to 4 or 5 feet; compact and bushy in habit, and in June is covered with large, single yellowish white flowers of indescribable heauty. Planted in groups in the shrubhery, it produces an effect to which no description can do justice. Makes a handsome single specimen for the lawn. Very similar in growth and character to the much-talked-of Rose Hugonis, which has single yellow flowers. \$1.00 each.

STENANTHIUM ROBUSTUM

(Mountain Feather Fleece)

This remarkably hardy perennial is without doubt one of our best new introductions, and may be classed with the showiest of all herbaceous plants. As the buds begin to unfold, they are quite upright, and of a light green tinge, gradually becomes whiter until at last they burst forth into a veritable snowbank of drooping, fleecy bloom of the purest white, the panicles often 2 to 3 feet long. After several weeks the flowers, as they ripen, turn to shads of pink and purple. It is a vigorous perennial, attaining a height of 5 to 8 feet, and is absolutely hardy throughout the United States and Canada.

The Mountain Feather Fleece is of easy cultivation, but takes some time to become well established and if given plenty of food, makes a wonderful show equaled by few plants of any description. It prefers a moist and partially shaded position. It would be impossible to give an idea of the wonderful effect of a large mass of Stenanthiums when in full bloom, as no description conveys the beauty of the delicate feathered, drooping flowers. Strong plants, 35 cts. each; \$3.50 per doz.

POT-GROWN ROSES

(Teas and Hybrid Teas)

- ty. Noted for its long blooming period, which lasts from June until frost. Color is a rosy copper, flushed with golden yellow. Blooms are unusually large, and are quite full in form. Research the formula of the control of the contr Betty. markably fragrant.
- Columbia. One of the largest Roses among the recent introductions, flowers occasionally measuring 6 inches across. The color is a splendid pink, which becomes more intense as the blooms grow older. The flowers are borne on long stems that are usually thornless 10 inches below the flower.
- Dean Hole. Large, pointed, silver-carmine blooms, shaded with crimson, delicately fragrant. The bush produces great quantities of blooms.
- Gruss an Teplitz. The crimson-scarlet blooms are produced in great profusion from early June until the time of killing frosts. An excellent variety for mass plantings and for Rose hedges.
- fley. Deep velvety crimson, which retains its color. Both buds and flowers are beautifully formed. Hadley.
- Jonkheer J. L. Mock. Practically a double-covered bloom, because of the bright, cherry-red on the outside of the petals and the shiny, silvery white on the inside. Unusually large and well-formed.
- Kaiserin Auguste Victoria. An old sort which possesses so many perfections that it is still one of the most popular varieties. The creamy white blooms are produced in great numbers until late autumn.
- Killarney. The long, pointed buds are an exquisite pink, and are borne in great numbers. This is a favorite for cut-flowers and is still one of the most popular varieties, although it has been known for more than twenty years. Delicious perfume.
- Los Angeles. One of the prettiest of the recent introductions. Its color is a splendid flame-pink, toned with coral, and shaded with translucent gold at the base of the petals. Exceptionally fragrant. The plant makes a vigorous growth and the beauty of the blooms is maintained from the bud until the last petals fall. \$1.75 each.
- Mme. Caroline Testout. Broad petals of bright stainy rose, slightly darker at the center and carmine-pink at the edges. Bushes are quite vigorous and produce great numbers of blooms.
- Mme. Edouard Herriot. Buds coral-red, opening to medium-sized blooms of coral-red, shaded with yellow and bright rose-scarlet, which still later change to shrimp-red. Winner of the Gold Cup offered by the London "Daily Mail" for the best new Rose at the International Exhibition in London.
- a Aaron Ward. Long, shapely buds of Indian-yellow, occasionally flushed with salmon-rose. Flowers freely all through the season.
- Mrs. Charles Russell. Large, globular, shapely blooms of rosy carmine, with scarlet center. The bush makes a strong growth and produces a multitude of specimen blooms.
- Ophelia. Light salmon-pink blooms which shade to yellow at the bases of the petals. Considered the best Rose of its color, as the blooms are large in size and very attractively formed. Blooms freely throughout the season and far into the autumn.
- liance. The strong plants produce hosts of handsome flowers, which range in color from light silvery flesh to salmon-pink, suffused with pink and yellowish coppery red.
- Sunburst. Large golden yellow flowers, with orange yellow centers, borne on strong, upright stems; excellent for cutting.
- Willowmere. The buds are a combination of carmine-coral and red, but open to a rich shrimp-pink, shaded with yellow in the center and toning to carmine-pink at the edges of the petals.
- Prices, except where noted, for strong 2-year field-grown plants, potted up last fall, \$1.00 each, \$10.00 per doz.

HYBRID PERPETUAL ROSES

- Baroness Rothschild. Large, pale rose blooms of superb shape, each set in a cup of lovely foliage. Delightfully fragrant.
- ptain Christy. The plump buds have backward curling petals, which show perfectly the contrast of light and dark pink. When open the blooms are darker toward the center. The plant is rather dwarf, but is exceedingly vigorous and produces a great number of blooms annually.
- Captain Hayward. Bright crimson-carmine blooms of perfect form; exceedingly fragrant.
- o. The large globular flowers are borne on long stems, making this a valuable variety for cutting. The color is satiny-flesh, with pink center.

- Frau Karl Druschki. One of the most popular white Roses. The blooms are quite large, sometimes exceeding 5 inches in diameter. The growth of the plant is unusually strong; it bears great quantities of blooms in June and occasionally will bloom in the autumn.
- neral Jacqueminot. An old variety with large, full blossoms, brilliant scarlet-crimson, with deeper venings near the petal bases. Often called the "Jack Rose" and considered one of the best of its color and class. No rose-collection is complete General Jacqueminot. without it.
- George Arends. The plant makes a strong growth, and bears an abundance of well-formed pink flowers.
- Magna Charta. Noted for its fragrance and abundance of blooms. the color of the flowers is a rosy pinkish carmine.
- Mme. Gabriel Luizet. Light, satiny pink blooms of splendid form.

 A variety which is not found in many collections.
- Mrs. John Laing. Soft pink blooms, extremely large and exceedingly fragrant. Most attractive when in bud, as the petals are quite long. The plant makes a strong growth.
- Ulrich Brunner.

 long stems.

 red varieties in this list.

 The light red flowers are borne in profusion, on the color of this flower is quite distinct from other in this list.
- Prince Camille de Rohan. Very dark, velvety crimson, almost black.
 Many experts consider this to be the best dark Rose in existence.

 Prices, except where noted, for strong 2-year field-grown plants, potted up last fall, \$1.00 each, \$10.00 per doz.

ARTEMISIA LACTIFLORA

One of the best introductions of recent years. It is a plant of noble appearance, 6 to 8 feet high, having beautifully formed, dark green leaves, and bearing feathery spikes, 3 to 4 feet long, of the purest white; sweetly fragrant and flowering in late autumn. \$2.50 per doz.; \$18.00 per 100.

BAMBUSA JAPONICA (Metake of Gardens)

One of the best known of all the hardy Bamboos. The stems are often 15 feet high, with internodes 6 to 8 inches long, and with tapering leaves a foot long, smooth and shining above, glaucous beneath. It forms fine clumps when sheltered from the East wind, and will grow in drier situations than most Bamboos. Large plants, \$1.00 each: doz. \$10.00.

GYPSOPHILA (Scorzoneraefolia)

Beautiful rose colored Baby's Breath. It grows from 3 to 4 feet high, and bears the whole summer through a mass of deep rose-colored flowers, while the leaves are glaucous. A distinct novelty and extremely rare. \$2.50 per doz.; \$15.00 per 100.

MONARDA OR BERGAMOT (Oswego Tea)

Showy plants growing from 2 to 3 feet high, succeeding in any soil or position, with aromatic foliage, and producing their bright flowers during July and August.

Didyma Cambridge Scarlet. (Oswego Tea). Brilliant crimson scarlet. \$2.25 per doz. \$14.00 per 100.

BLACKBERRY LILY (Pardanthus Sinensis)

Lily-like flowers of a bright orange color spotted with red, which are succeeded by seeds that resemble blackberries. Very showy and desirable, \$2.00 per doz. \$13.00 per 100.

PLUMBAGO LARPENTAE

A dwarf plant covering the ground completely with its foliage. In September it is a mass of beautiful deep blue flowers, which gradually change to violet. \$2.50 per doz.; \$15.00 per 100.

THE MOSSY STONECROPS

Grow about 1 to 4 inches high, bear diminutive flowers between May and July, and make an exquisite carpet of evergreen foliage which is particularly attractive in winter when some of them assume tones of bronze. Uses for which they are recommended: (1) To convert stretches of sand and rock into carpets of verdant green; (2) to carpet rose and bulb beds; (3) to soften the lines and to take away the new "look" in rock and formal gardens. Examples: S. acre; S. reflexum; S. sexangulare; S. Stahlii.

S. reflexum; S. sexangulare; S. Stahlii.
Acre. Golden Moss. Grows 2 to 3 inches high; yellow flowers in July; leaves are only ¼ inch long.
Reflexum. Stone Orpine. Small, bright yellow flowers making up a flat cluster 1 to 1½ inches across. July.
Sexangulare. Six-rowed Stonecrop. Flowers golden yellow. The reddish cast of the new growth is charming. July.
Stahlii. Yellow flowers in August. Its egg-shaped leaves, about ½ inch long, turn a beautiful crimson in the fall. The best Stonecrop for the South; this is the only variety requiring a protected situation in the North. situation in the North.

Above varieties, \$2.50 per doz.; \$15.00 per 100.

Special Prices for Gladioli

In the whole range of summer-blooming bulbs there is nothing so desirable or useful as Gladioli, and nothing so easy to grow. Failure is practically impossible. For several years the demand for Gladioli has more than doubled every year, and there is no reason why it should not continue to do so, as they are the most attractive and useful of summer-flowering bulbs, and as cut-flowers all through the summer and fall they hold a place that cannot be taken by any other. Wonderful improvements are being made in size, color, and beauty. They are very effective in lines or beds or when planted in small groups among shrubbery, peonies, roses, or in the hardy plant border. The bulbs in our assortment are strictly first-class, and range from 1½ to 2 inches in diameter, and all are flowering size. Our list includes only the best, both in named varieties and in mixture.

Culture: There is nothing more easily grown than Gladioli. They thrive in any ordinary good garden soil. Plant about 6 inches apart and 3 inches deep, and if a succession of bloom is desired, plant at intervals of ten days from the first of April, or as soon as the frost is out of the ground, until the first of July. Late in the Fall, before freezing weather sets in, dig the bulbs up, cut off the tops, and store until Spring in any dry place that is free from frost. Your stock should increase annually.

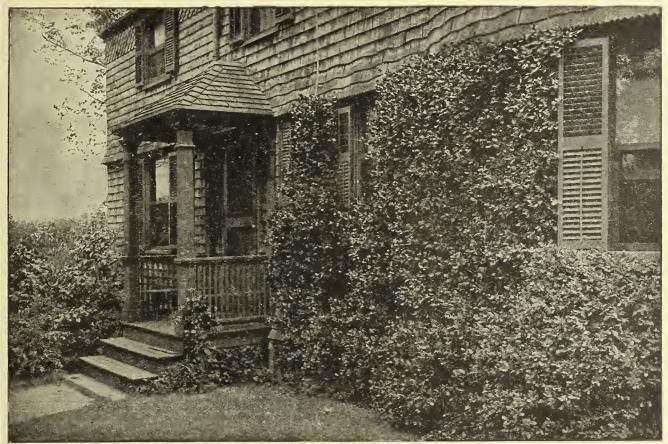

EIGHT SUPERB GLADIOLI

TWELVE POPULAR GLADIOLI

War. Deep blood-red shaded crimson black, very tall.	100	All Gladiolus bulbs offered measure from 11/4 to 11/2 inches in diameter, and are strong, flowering bulbs.
A magnificent variety that is especially attractive when used with Peace, either in bouquets or beds\$1.25 Europa. This magnificent European variety has been	\$ 9.00	America. Conceded to be one of the finest varieties for cutting or bedding ever sent out; a beautiful soft flesh-pink; orchid-like in its coloring and texture; growth and habit perfect
on the market for several years, but is still scarce. 3 each of above varieties, 24 in all, \$2.90.		6 each of above varieties, 72 in all, \$5.75.

XXX MIXTURE

This is a specially fine mixture, made up of over 100 fine named varieties, and includes also a good percentage of Childsii Hybrids. Just the stock for those who want only the best that can possibly be had. We have sold hundreds of thousands of this mixture and we have now improved the quality and reduced the price. 75c per 12; \$5.50 per 100.

EUONYMUS RADICANS VEGETUS

The Best Evergreen Vine for America

Is the ivy the best vine in the world? Doubtless every Englishman will cry "Yes!" because the European or English ivy (Hedera Helix) is the oldest evergreen vine in cultivation and has made the deepest impression in literature, art and history. But if your standard is merit, not associations, there is another vine which seems to me inherently better, viz., the Climbing Euonymus; or as I now propose to call it, the "Evergreen Bittersweet." True, the form of its leaf is not unique, like that of ivy, but it has one overwhelming advantage in its gorgeous red berries, which are resplendent all winter against a noble background of evergreen foliage. And in many other ways it has a greater value than ivy, even in regions where the ivy is hardy.

The accompanying pictures give but a faint hint of the five-fold glories of the Evergreen Bittersweet. In the first place, it is evergreen, and therefore has an obvious advantage over deciduous vines in being beautiful 356 days of the year, instead of two weeks or seven months.

Secondly, it is very accommodating as to soils, climate, exposures; is easy to grow; and will trail over the ground or climb to the noble height of 30 feet.

Thirdly, it has an immense advantage over ivy, in being much hardier, growing 20 feet high in New England, where ivy can be grown only as a ground-cover.

Fourthly, its superb red fruits, which closely resemble those of our common wild bittersweet, seem divinely appointed to redeem our American winters from their bleak, ugly and cheerless moods. And fifthly, it promises to develop a strong American character, becoming universal and dear to the American heart. If I had a million dollars to spare I should like to plant an Evergreen Bittersweet against every stone, brick and concrete wall in America. The effect would be electrical, for it would add 100 per cent. to the beauty of America. And it would only be anticipating by a hundred years what will surely happen, for it is hardly possible that the world holds any plant with greater power to transform a house into a home. As in England every home and every church is enriched, dignified and ennobled by ivy, so every American home will come to be connected so closely with the Evergreen Bittersweet that it will be impossible to think of one without the other.—Wilhelm Miller, in the "Garden Magazine." November, 1912.

We have known for several years of the great merit of the vine, Euonymus radicans vegetus, so enthusiastically described by Professor Miller, and have been steadily getting up a large stock of it, and now have several thousand plants. It is a sport from Euonymus radicans, but absolutely distinct from that vine.

Perfectly hardy, but when planted in the fall should be protected with a mulching of three inches of stable manure, being careful not to cover the evergreen foliage. Very slow-growing at first, but when well established grows with great vigor. We can supply the variegated form of this plant if desired.

Pot plants, 50 cents each, \$5.00 per doz. Small pot plants, 30 cents each, \$3.00 per doz.

Elliott Nursery Co. Pittsburgh, Pennsylvanià

For the Convenience of Busy People

You, too, may be one of the many genuine flower lovers who would like to have some Hyacinths or Narcissi, provided you could find time to make selections. You want, say, a bed of Darwin Tulips, and you do not care what the varieties are provided only that the colors blend and that the flowers are fine. However, you cannot afford to select from the many hundred varieties offered in our catalogue. In a word, your time is money.

Garden enthusiasts, with plenty of leisure, select their color coinbinations for a given position as carefully as a hostess, entertaining an honored guest, plans her dinner. They demand and rightly demand, the big comprehensive catalogue, and it is part of our service to see that they get it.

Yet you busy people are entitled to a service equally as good. Consequently, we have considered your problem and have prepared, for your convenience, the following collections of Narcissi, Hyacinths, Tulips and Crocus.

The varieties selected are among the finest of the standard sorts, the colors will not clash, and the bulbs are of the Elliott quality, that is to say, "the finest in the world."

Mark (X) in the square opposite the collections desired; write your name and address in the space provided; mail this circular to us and we will see that you get your bulbs at the proper planting time this autumn.

The following collections are packed specially in Holland; each collection of a given designation is exactly like every other collection of the same sort. Those who wish special varieties must order from our catalogue.

Narcissi, the Democrats of Flowers

The Narcissus or Daffodil is too easily grown to call forth the glowing enthusiasm to which it is justly entitled. Timid, dainty things they are, that await the resurrection of their neighboring crocus friends before they venture forth out of their Winter dream and sleep. They ask for no attendants, require no special culture and yet present a scene of beauty that delights equally the esthetic vision and the gaze of the untutored eye, each already weary with the dull drab of a tedious Winter.

They have all the grace and charm of the true aristocrat with the reckless freedom of the unhampered democrat; asking no privileges and yet asserting their inherent right to herald the arrival of Easter and of Spring. It is indeed surprising that any American garden should be without these delicate and yet hardy plants and flowers.

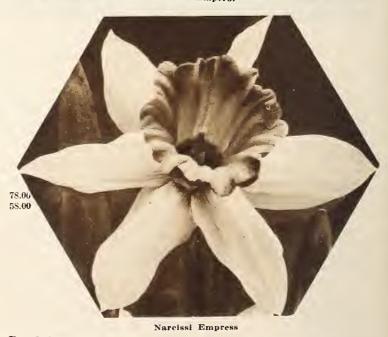

We presume that for every Narcissus bulb planted there are one hundred Tulips or Hyacinths. That this is a great mistake, anyone really familiar with their great merits must admit. Daffodils lack the brilliancy of color of the Tulips, but greatly surpass them in variety, delicacy and gracefulness of form, and one never becomes tired of their soft, beautiful colors.

The great point in their favor is that they are permanent additions to the garden. All that they ask is that they be allowed to remain undisturbed, and they will increase in size and beauty year after year, blooming profusely and in great numbers each year. Many varieties are perfectly at home naturalized in the grass, provided the grass is not cut before their tops have time to ripen.

TRUMPET NARCIS	SI
1	Doz. 100
EMPEROR. This is the largest and	
finest deep yellow trumpet-flowered Daffodil in eultivation, and is really	
superb, both in foliage and flower.	
Either for the garden or for natural-	
izing, it is one of the very finest	
varieties and cannot be commended too highly. Monster bulbs, more	
than twice the size of those usually	
sold	
First quality selected	
EMPRESS. (Bicolor). This may be eousidered rather a high-priced Daf-	
fodil for planting in the grass, but	
the effect produced is so lovely, and it	
is so hardy and vigorous, that noth-	
ing can be planted that will be more satisfactory, and, as we control the	
best stock of it in Holland, we	
can make a specially low price. If	
planted in orchards, meadows or any	
place where the grass is not mown by a lawn-mower, these Daffodils	
will increase in quality and beauty	
year after year. Where they are	
planted, the grass must not be mown	
before the middle of June, so that the bulbs may have time to ripen be-	
fore the tops are cut off. Our Em-	Doz. 100
peror and Empress Nareissi are more	
than double the size of the bulbs	2.244 0.00
usually sold. Monster size First quality selected	
Fairy. Perianth primrose, trumpet	100
chrome-yellow. A beautifully formed	
large trumpet. One of the most de-	
sirable for the garden as it is a strong grower and one of the few	
which will come up each year with-	
out deteriorating	1.25 9.00
Glory of Leiden (True). Perianth and	
trumpet of deep yellow. The largest and finest of the newer Daffodils. A	
superb and distinct variety that	
should be included in every ama-	
teur's collection of choice Daffodils Glory of Noordwijk. This is one of the	1.10 7.50
finest and largest of the Bicolor	
trumpet Narcissi. Perianth sulphur	
white, trumpet clear yellow, very	
large and graceful and with re- flexing brim	1.50 10.00
GOLDEN SPUR. This is one of the most	1.50 10.00
valuable of the Trumpet Nareissi,	
with magnificent, deep yellow trum-	
pet, the brim expanding like Maximus, and large, spreading, full, deep	
yellow petals. It is freely-flowering	
and splendid both for house culture	
and outdoors, and is one of the most	
desirable varieties for naturalizing. A charming, richly perfumed flower.	
Monster Size	1.25 8.50
First quality	.90 6.50
Wadame de Graaff. 'The largest and fin- est of the white Trumpet Daffodils;	
excellent for cutting	1.10 7.50
VICTORIA (Bicolor). One of the newer	
· varieties and the best of all the Bi-	
colors. Perianth creamy white, trum- pet rich yellow, delicately perfumed.

Double Narclssi Von Sion

Barrii Narcissi Conspicuus

Poetaz Narcissi

A new race of Narcissi produced by crossing Narcissus Poeticus Ornatus with the Polyanthus varieties. They flower in clusters like the Polyanthus, without their strong odor, and are perfectly hardy.

Very fine for growing in house and can be bloomed earlier than any variety of Narcissi except Paper White, which last Fall we had in bloom by October 15.

The Orderly Hyacinths

Hyacinths placed in orderly Dutch beds remind one of soldiers standing at attention, for though they do not speak they silently salute and their salutation awakens a sacred reverence within one's heart as he pauses to feast his eyes upon these gayly colored flowers. They seem happiest when placed in comradely fellowship with others of their own clan, though possibly of differing complexion. Unlike the Crocus and Narcissus the Hyacinth is helpless without the assistance of his gardener.

If one loves his plants, however, this is his great opportunity, as the Hyacinth welcomes attention and responds to every atom of care. For his labor the house gardener will find a rich reward. The delicate beauty of the flower is only surpassed by its rich fragrance; and the little bell-shaped petals suggest the music and harmony this flower would bring into our discordant lives.

Named Hyacinths of the quality imported by us can only be had from a few dealers in this country and are generally sold at much higher prices. They are selected exhibition bulbs, and have won first prizes wherever exhibited, both in this country and in Europe. Hundreds of our customers write that they have never seen such fine flowers as these bulbs produce. We are confident that anyone who will try these Hyacinths, or any of the named bulbs offered in this catalogue, will never again be satisfied with inferior bulbs.

First Size Named Hyacinths

(These are the finest Hyacinths obtainable anywhere at any price. They are frequently described as top root, exhibition mother bulbs.)

Hyacinth La Grandesse

Please Read Page 39

Second Size Named Hyacinths

The second size Hyacinths will be found fine for forcing and are highly recommended for those who desire extra good bulbs for bedding. They embrace the leading named sorts of the preceding list, are larger bulbs than those sold as mixed, and strictly true to name and color, thus giving exact shades wanted. We can offer them in the following varieties, all of which are described in the general list.

RED	DARK BLUE		BLUSH WHITE		PINK	
Doz. 100 La Victoire\$1.60 \$12.00 Roi des Belges. 1.60 12.00	Doz. King of Blues 1.60 Marie 1.60	$100 \\ 12.00 \\ 12.00$	Doz. Gen. Vetter 1.60 Grande Blanche 1.60	100 12.00 12.00	Doz. Gigantea 1.60 Rosea Maxima. 1.60	100 12.00 12.00

Dark blue	. 1.25	9.00
Light Blue	. 1.25	9.00
Yellow	. 1.25	9.00

Single Small Hyacinths for Forcing

These Single Small Hyacinths, planted on arrival from Holiand, may be had in flower early in January. The bulbs and flowers are about the same size as Roman Hyacinths, but much stronger, and the beils are larger. WHILE THEY DO NOT COST HALF THE PRICE OF THE ROMANS. Only those varieties which produce the fine flowers and force easily are selected for this class. They may be planted like Tulips in pots or boxes close together. Last season we sold large quantities, and our customers inform us that they are a GREAT ACQUISITION to succeed the Roman Hyacinths, blooming from January to April.

	Joz.	100

Prepared Dutch Hyacinths

ROMAN HYACINTHS, due probably to the neglect of the French bulb fields incidental to the war, have deteriorated in quality until they no longer give satisfaction. Consequently, until the quality is again satisfactory, we have concluded not to offer them. Instead we are offering Prepared Dutch Hyacinths for early forcing. These should be grown in the same manner you have been accustomed to in growing Roman Hyacinths.

FOR THOSE WHO WANT THE BEST

A Selection of the Finer Things in Narcissi

Varieties Shown on

Color Plate

1 King Alfred. A yeliow trumpet of the noblest character. Deep golden

Dozen \$3.00 100 \$20.00

2 Red Beacon. The finest

yellow.

Narcissi are now so generaly known and so extensively planted that it is hardly necessary to call special attention to their merits. However, specialists who devote their lives to this work constantly produce new varieties. The Narcissi shown on the color plate opposite together with the list following are in our judgment the very best of the newer things, and represent a real improvement over the standard varieties.

For standard varieties of Narcissi see page 12.		and most intensely brilliant of the Barrii type. Dozen \$4.00 100 \$30.00

Breeder Tulips seem to speak of noble birth and long aristocratic lineage, since there is a restrained elegance in the almost sombre-toned bronze colors that remind one not only of an ancient cultivated family but also of old mahogany finished in quiet dark shades; or perhaps of soft appealing music from an instrument of reed or string. The Breeder speaks of the higher ranges of life.

Not only the color but also the fragrance is delicate, like costly scented waters that are treasures of a well equipped boudoir. All together these stately high-breds are thoroughly enjoyable because the eye tires of brilliant shades alone and wants them softened by the contrast provided by these quiet restful beauties.

We are ever needing the strongest influences to call us away from the sordid pursuits and estimates of life and there is a powerful appeal in a flower that suggests dignity with restraint, as well as elegance with simplicity. The Breeder Tulip makes a distinct and worthy contribution to any garden of flowers.

White Crocuses and Fluffy Chicks

The first peeping Crocuses and the first peeping, fluffy chicks seem some way close of kin, even though biologists do not rank them of the same house and lineage. They both come when winter is still contending for the right to reign when Spring is only timidly and feebly throwing out her light and warmth. Every other thing of beauty seems afraid of frost and sleet and snow, but the brave, smiling crocus is undaunted by the cold.

In all the Summer months which follow, no other plant of gorgeous size or radiant color appears which calls for such shouts of actual joy as do these harbingers of warm and sunny days. Crocuses are intruders without being supplanters, as they modestly lift their delicate petals alongside the grass without uprooting it—both waking together from their long Winter sleep. These dainty little flowers assure us that Spring is at the door, therefore, everybody watches them, knows them and loves them.

Even the possessor of only the smallest strip of grass should have it filled with Crocuses. The cost is but a trifle, and once they are planted they are no further trouble. They bloom beautifully year after year, and do not interfere with the mowing or care of the lawn. Grass, however, should not be mown for two weeks after the flowering of Crocuses, but it does not ordinarily need cutting earlier than this. They should be planted in the Fall and set from one to two inches below the surface of the ground; They can be planted with a narrow trowel or a stiff-bladed knife.

Narcissus—Paper White

Some flowers are like certain esthetic people whom we meet, in whose faces are seen the rarest delicacy of features joined to the most austere and simple surroundings. The Paper White Narcissus belong to this unromantic but most winsome class. Their demands are most meagre:—an old abandoned kitchen bowl, a few odd pebbles from the brook among which the bulbs nestle as if it were genial soil; water to cover them fully, with light and warmth to hasten them forward and the kitchen or living room is soon made into a place of cheer for November or April. Nearly all plants require some special earnest care, but these immaculate delicate flowers ask only the barest opportunity and they thrive as if it were a joy to live. Any lover of pure white blossoms can succeed with these plants, though they have neither garden and soil and but one little window where light can creep in. Every house should have them. *

You may grow these bulbs in soil or in fibre, in pebbles and water in a bowl, or in water alone in a Hyacinth glass, which ever method is the most convenient for you. It is as nearly impossible as anything can be in this life to fail with Paper White Narcissus.

Scilla Sibirica. Finest sky-blue. One of the loveliest Spring flowers; it has a color almost as deep as the sky itself. It is quite hardy and flowers outdoors at the same time as Snowdrops, in front of which it has a charming effect. It is fine for plant-

ing in the grass.....

The Most Beautiful Darwin Tulips

Now that the Darwin Tulips are becoming known, and their splendid beauty generally appreciated, our customers are inquiring what are the very finest varieties of these bulbs. In our judgment, the varieties shown on the color plate opposite, together with the varieties described blow, are absolutely the cream of the Darwin Tulip collection. After a careful comparison of all known varieties of Darwin Tulips, we unreservedly recommend these varieties to those who want absolutely the best that can be obtained.

MONG true lovers of flowers, the simple, well-known friendly plants are never entirely forgotten. They have an effect upon the eye that is only equalled by the music of childhood in its sensitive influence upon cultivated minds in mature life, when suddenly the sweet, familiar strains reach the ear. Some flowers are so catalogued as to frighten the amateur and make him afraid to attempt the cultivation of the plant. These varieties are so familiar, so friendly, so actually gay in their simple charms that every eye admires them; and yet so easy to cultivate that every one can grow them. Other plants may seem to live to be admired, while these flowers suggest that they live alone to be enjoyed. Every garden should have at least one glad corner where these tulips are the chief thing of beauty.

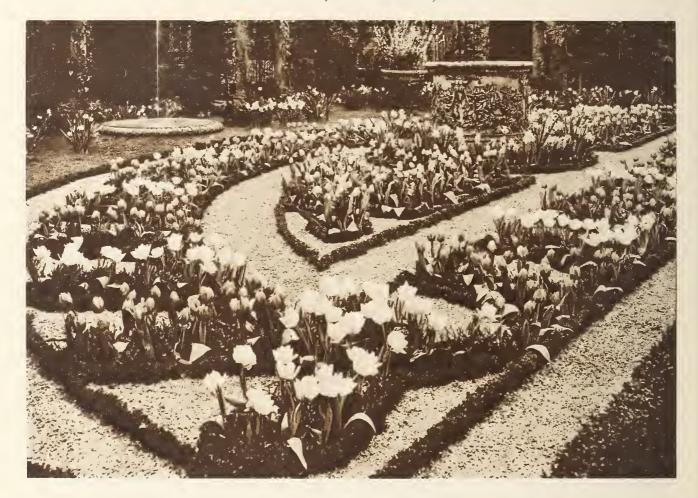

Named Single Early Tulips

The letters, A, B and C, indicate the proportional earliness of the varieties if planted outdoors. A and B may be used together for bedding purposes, but those marked C are later. The numbers preceding names show the height of growth in inches. Those marked F after the name are the best for forcing in the house or greenhouse.

Early Double Tulips

The saddest feature in the lives of Tulips is the brevity of their days. Some of us feel that we can hardly be reconciled to their early fading. They have glorified life while they were here and then suddenly their beauty vanishes. The double Tulip comes to lessen our regret. It begins to bloom later and continues longer, and is therefore a necessity to full Tulip season. Each year the interest deepens in the cultivation of these beauteous creatures of the soil, that display such radiant and indescribable tints and that rest and refresh and gladden us in the tedium of life.

There are flowers that are transient in their hold upon our affections, like fads in fashion of manner and dress, but Tulips increase in the attachment and devotion which they credit through the years and have become a stable as well as a staple article in the market. The double Tulip therefore serves a double purpose.

The double Tulips are very desirable for bedding purposes. White, red and yellow sorts, of about the same height, planted in lines of three or four rows of each color, form, with their large, rose-like flowers, beds of surpassing grandeur. Their flowers, being double, are quite persistent, and being also late in blooming, they serve to prolong the season of gorgeous beauty in the Spring flower-garden. Those sorts marked with an asterisk (*) are the earlier kinds, which are not only valuable as bedders, but succeed admirably if forced in pots. Those not so marked are not recommended for pot culture. A's flower together, B's follow, etc.

The Double Early Tulips have massive flowers of brilliant and varied colors, shades and markings, and last much longer in bloom than the single varieties. They are robust growers and exceedingly effective.

Parrot Tulips

Parrot Tulips sometimes do not bloom satisfactorily, owing to improper planting. They like a light, sandy soil, shallow planting, and a sunny location.

Parrot Tulips do not receive the attention they deserve. These belong to the late or May-flowering Tulips, and have immense, attractive flowers of singular and picturesque forms and brilliant and varied colors. The petals are curiously fringed or cut, and the form of the flower, especially before it opens, resembles the neck of a parrot. They form extravagantly showy flower-beds, and should be grown in every flower garden in quantities. They are especially desirable for cut-The Parrot Tulips we import are from the most famous grower of these in Holland, and very superior to those usually sent out, which are often immature bulbs and will not bloom well under the most favorable circumstances.

Tulips Ellen Willmott

THE PRINCELY DARWIN TULIPS

When visiting a quiet garden of Tulips or reveling in the larger display of a great Tulip Show, the inquiry naturally arises: "To what degree of imposing beauty has the Tulip come through these long years of careful culture?" The Darwin is the answer to that inquiry. It has been an evolution, a long evolution. The results of many generations of skillful culture have culminated in the Darwin.

Other varieties may consort with this first-rank Tulip, but none need pose as rulers of the realm. The Darwin is the Crown Prince and heir to the throne. In the stately development of the stem and the equally striking flower that crowns it, every rare tint has been retained and a very riot of colors display themselves in rose, heliotrope, claret, crimson-marooned with other wonderful shades that are known and prized by lovers of flowers.

Darwin Tulips are most valuable for permanent planting. With deep planting, four to five inches in heavy soil, and six inches in light soil, they will continue to bloom for years, and for this reason they are very valuable for planting in shrubberies and borders. They also thrive in semi-tropical climates, such as those of California and the Southern states, better than the early Tulips.

General List of Darwin Tulips

Ocheral Elst of Barwin	Lumps	
Doz.	100	1,0
Andre Doria. Deep velvety maroon with black base. One of the finest border varieties of its color and of a low		
price. Will give great satisfaction\$0.90	6.50	
Ariadne. Briliiant, scariet with biue base; splendid bedder	6.00	
Beethoven. Beautiful, soft rose-pink, shading to silvery pink	7.00

sent by parcel post when requested and postage charged at cost.

Lilies

The greatest of all Naturalists said "Consider the Lilies." The centuries do not change that dictum. Lilies forever stand apart from the rest in the kingdom of flowers, as something akin to virtue. Lilies are symbols of delicate, unsulled beauty. Some brilliant blossoms are voluptuous in their lines as if paint and rouge were added to their enameled skins, but the lilies whisper of reflued restraint and the happiness that goodness brings into human life. The universal love and reverence felt toward lilies makes all culogies seem common-place and thus superfluous, since men and women of every degree of culture turn aside to eujoy the winsome picture that lilies offer.

Lilium Candidum

Many people think that it is necessary to plant this lovely Easter or Annunciation early in September. This is not true. We have repeatedly planted them in November, and with complete success. In the Fall of 1918 we planted over 10,000 bulbs late in November. These bloomed splendidly the following June, and we sold flowers in the wholesale cut-flower market for more than double the price of the bulbs. Owing to the demoralization of the transportation systems of the world, it is no longer possible to deliver Candidum Lilies by September 1st, and people who insist on such early delivery are only depriving themselves of one of the loveliest of all garden Lilies. We have made arrangements for the earliest possible delivery, and, if these Lilies come in late, will not ship them to Northern points where it is actually too late to plant them.

 Doz Selected bulbs

Our bulbs of this splendid white Lily are the finest that come to America and are much larger than those usually sent out. We can supply bulbs from both southern and northern France.

Japanese Lilies

Transportation between Japan and United States is not yet back to its pre-war schedule and consequently, Japanese Lilies may not arrive in time for Fall planting. In this event the bulbs will be carefully packed in sand and placed in safe storage until the proper planting time in the Spring, when they will be distributed.

Auratum. Gold-banded Lily of Japan. Large and graceful flowers of delicate ivory-white, closely dotted

 with chocolate-crimson spots; the center striped golden yellow. 3-4 feet. July and August

Tigrinum splendens flpl. Double Tiger Lily.	0.50	15.00
Orange red blooms, spotted with black	2.50	15.00

Lilium Superbum

Special Offer of Superbum Lilies

We make an annual contract to have 25,000 bulbs of this grand Lily grown for us. This enables us to offer it at low prices, which make it available for naturalizing in quantity. It is unquestionably one of the most satisfactory Lilies that can be planted either in the garden or in meadows, on the edge of woods or in any rough or wild parts of the grounds, where it will take care of itself without any attention whatever after planting. It will also thrive in wet or swampy places. It is a grand Lily, often growing over eight feet high, and produces twenty to thirty orange-red flowers in July, when flowers are apt to be rather searce.

Prices of extra-selected bulbs, \$2.00, nor dozent, \$2.50, for \$2.51, 200

Prices of extra-selected bulbs, \$2.00 per dozen; \$3.50 for 25; \$13.00 per 100; \$30.00 for 250.

December. Each \$0.50. Dozen \$5.00			

Calla Lilies

White Calla (Richardia Aethlopica). The White Calla, or Lily of the Nile, is a well known plant of easy culture, and in Winter is one of our best window plants. To aid profuse blooming keep them dormant from the middle of June until the last of August; repot in good, rich soil, using 6 to 8 inch pot; give water, light and heat in abundance, and the result will be most satisfactory.

Lillum Elegans

R AINBOW, Fardel's Strain. A wonderfully improved stock of colored Freesia, comprising a large number of beautiful shades of yellow, blue, mauve, pink, lavender, etc. The flowers are as large as the best white type, and equally as fragrant. We offer them in mixed colors only. Dozen, \$0.70; 100, \$5.00.

Freesla Purity

TERMS OF PAYMENT, Etc.

Please read before ordering

YACINTHS, Tulips, Crocuses, etc. The prices quoted in this list on all Dutch Bulbs, Bermuda Lilies and other bulbs for advance orders, which must reach us not later than July 1, 1923. To make these very low prices, we must have our orders in advance, as we cannot take any risk of having stock unsold on our hands. The bulbs will be delivered upon arrival, and need not be paid for until after delivery. Prices quoted include duty and all charges, except freight, expressage, or postage, from Pittsburgh. On small lots of bulbs sent by mail, postage will be charged at cost, including insurance.

TIME OF DELIVERY: Bermuda Lilies arrive in August; Roman Hyacinths, Freesias, Candidum Lilies and Paper-White Narcissi in September; Dutch Bulbs, Hyacinths, Tulips, etc., in October. In ordering please state whether you wish your bulbs shipped as they arrive, or all in one shipment. In absence of instructions, we will send all bulbs in one shipment, except Japanese Lilies and Lily-of-the-Valley, which will be shipped upon arrival, in November, December, or following Spring. Transportation conditions

are still so unsettled that we cannot guarantee time of delivery, but in the event of late delivery, northern orders will be shipped first, and extreme southern ones last.

SHIPPING INSTRUCTIONS: Please send full shipping instructions. State whether goods are to be shipped by express or parcel post, and by what route. In the absence of instructions, we will ship by whatever method and route we think best. Please print your name and address on your order. Many times it is exceedingly difficult to read these two important points of an order, and a shipment may go astray.

TERMS OF PAYMENT: Our terms of payment are invariably cash on delivery, which does not mean that we ship C.O.D., as we will not do so under any circumstances. We deliver the goods and mail bills at the same time, and expect payment within a few days. People unknown to us will please send references with their orders. Those who wish to send cash in advance with their orders will be allowed a discount of five per cent from the prices quoted on this list on all orders made up from this catalogue, received before July 1, 1923.

GUARANTEE: We guarantee all trees, shrubs, plants, and bulbs furnished by us to be first class, and true to name.

We do not guarantee stock to grow, or results in any way. No complaint will be entertained that is not made immediately upon receipt of stock.

There are so many causes for failure over which we have no control that we can assume no responsibility after stock is delivered in good order. Poor soil, unfavorable weather, ignorant or careless culture, all contribute to failure, and all are beyond our control.

EARLY ORDERS: The earlier orders are given, the better we can have them filled. Some of our customers are now giving us orders to be delivered next Spring. Our representative usually sails for Europe early in June and personally selects the stock for all import orders received by July 1st.

PRICES: Six plants of a kind will be furnished at the dozen rate; fifty or more at the hundred rate, and five hundred or more at the thousand rate. Less than six plants of one kind or variety will be sold only at the single rate.

CANCELLATIONS: No request for cancellation can be granted after July 10th, when the final orders are sent to Holland.

Import orders taken subject to the failure of the crop.

CULTURAL DIRECTIONS: With each shipment of bulbs we send printed cultural directions, giving full instructions for growing in the house as well as outdoors.

PARCEL POST: Bulbs and plants can now be sent by parcel post, and when it is advantageous we always do so.

Competent Landscape Gardening Advice

The vast majority of our American suburban and country places are made without the aid of professional advice. Indeed, it would appear that most persons do not know that such advice is either available or desirable. The result is what might be expected; around every city one will see a hundred or more layouts, mediocre or worse, before he will meet one that is at all worth while.

Competent Landscape Gardening advice is available, and an hour's ride about any of our cities will prove its desirability. In addition to the worth while results he gets for his clients, it is usually less expensive to employ a landscape architect than to dispense with him. The landscape architect who knows his business is first of all a practical engineer; he builds no roads that have to be moved; he makes no grades that the first rain will wash away. He is also a practical horticulturist; he specifies no plants that are not likely to thrive in a given situation. He wastes none of his client's money because of lack of knowledge of the problem or of the best thing to do. Finally, and most important, he is an artist, and his finished work will not only be convenient in its arrangement, but beautiful in its appearance.

We do Landscape Gardening. In thirty years of continuous practice, we have met and successfully solved every possible landscape problem. We can not only solve your problem successfully, but we can in addition, probably save for you the very modest fee we charge for our work, because we will not make the mistakes that the amateur invariably makes. It is seldom, indeed, that our finished work requires changes or alterations.
